

Diving conditions 2016

We are looking forward that you decide to dive with us.
Following you find our diving conditions – we ask you to read these carefully
and to sign below.

Medical certification, brevet, logbook

For FUN dives you need a valid medical diving certificate (less than 12 months old), your highest certification card and your logbook. If you participate in diving courses the medical certificate should not be older than 3 months.

Diving rules

A check dive is required for all divers. Instructors may be exempted from the check dive! The check dive can be done from the beach, or, depending on the assessment of the instructor of the EDS, also directly on a boat dive.

The standard exercises (mask clearing, underwater characters ...) can be controlled from more experienced divers at the beginning of a normal dive - this dive will be continued as a normal FUN dive. We charge NO extra costs for the check!

Maximum total dive time is 59 minutes! For longer dives, you can book special packages. Maximum depth: 60m (only with CMAS 3* GOLD).

Our updated price list you find here:
http://www.europeandiving.com/images/stories/pdf/Tauchpreise/Eng/A2_Beginner_prices_ENG_2015.pdf.

For your own safety 1 computer per diver for guided dives is required, for autonomous divers 1 computer + a surface marker buoy with rope (better Reel and buoy with pressure relief valve). Spools and wound up lines e.g. on lead weight are not advisable!

You can only use CE - approved dive equipment.

Dive spots and statutory rules

The dive spots are according to the dive level. The following list of regulations is based on the french diving law and has to be followed by divers and the diving centers. (Arrêté du 12.11. 2010 modifiant les dispositions réglementaires du code du sport.)

CMAS

1* CMAS Diver: Until 20 m with guidance of a 3* diver or a dive instructor.

2* CMAS Diver: Until 40 m with guidance of a 3* diver or a dive instructor. Until 20 m the 2* diver is allowed to dive autonomous with another 2* diver or higher level.

3* CMAS Diver: Only dive level (instead of dive instructor TL) which is allowed to dive autonomous until 60 m in France. Furthermore he is allowed to lead a group of divers of a lower level in the permitted depth of the lowest brevet of the group.

Please check with your association if your 3* brevet is accepted as a group leader! In Germany for example only the 3* of the VDST is accepted as a group leader. For details please ask your diving association if they have an agreement with the french association FFESSM.

PADI (according to PADI, see Instructor MANUAL, PADI)

In France the PADI rules are accepted - you are allowed to dive within the dive rules of PADI!

OWD diver: Until max. 18 m.

AOWD, Rescue, Dive Master, OWSI, etc.: Until max. 30 m.

With DEEP DIVER SPECIAL: AOWD, Rescue, Dive Master, OWSI: Until max. 40 m.

Only no-decompression-dives, because PADI educates in sport diving only no-decompression-dives.

PADI TEC REC is not yet accepted in France. Please check with us or directly with your association which possibilities you have to dive deeper than 40 m.

Deeper than 40 m only with CMAS 3*

Deeper than 60 m only with CMAS 3* and the according TRIMIX brevet

With my signature, I agree with the diving conditions of the EUROPEAN DIVING SCHOOL.
